

A photograph of a long, brightly lit hallway with a high, vaulted ceiling. The hallway is lined with rows of lockers on the left and a series of doors or lockers on the right. The floor is polished and reflects the overhead lights. A person is visible in the distance at the end of the hallway.

A schematic diagram of a three-phase, four-wire power supply system. It shows three phase windings (represented by circles with dots) connected in a star configuration. A central neutral point is connected to a neutral wire (represented by a circle with a cross). The three phase wires are labeled L1, L2, and L3, and the neutral wire is labeled N.
